# Axle and gearbox flanges

For the drive technology in vehicles

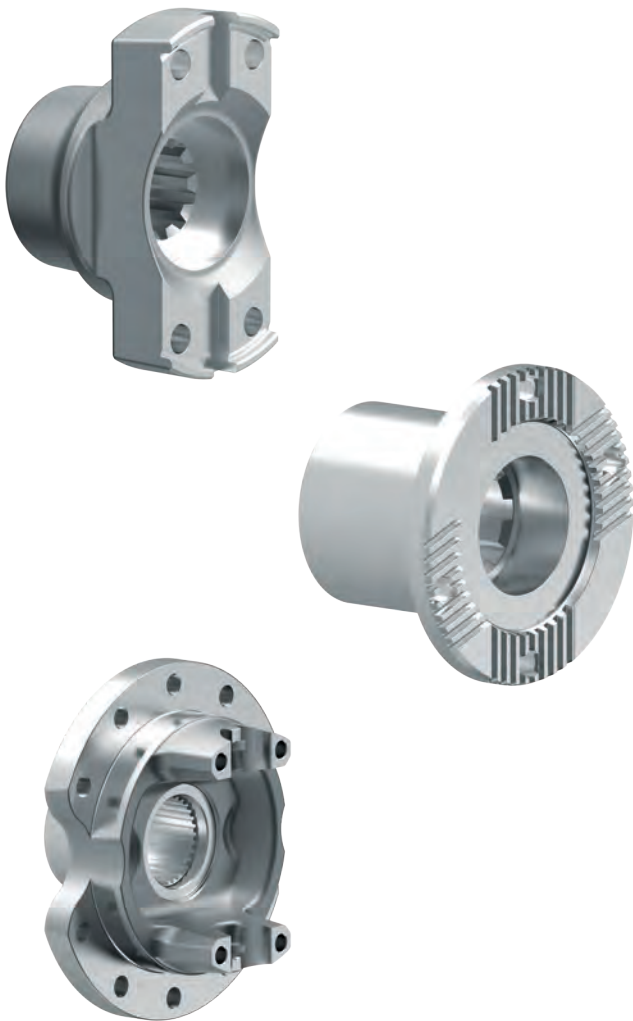

# Axle and gearbox flanges

Usable in

Off-Highway | Highway | Customizing

# We offer a selection of different axle- and gearbox flanges like no other market player.

As a manufacturer, we have acquired extensive expertise in over a hundred years of experience. We provide you with drive components that are precisely tailored to your needs - regardless of whether it is a prototype, a custom-made product, a small or large series.

## Execution

- Cross serration according to DIN 8667 and special execution
- Induction-hardened and lead-free ground seal bearing surface
- Internal splines
- External splines
- Deep-hole drilled
- Different sizes
- Different connections available
- Complete assembly ( e.g. dust protection plate and screws)
- Various materials and grades
- Surface finishing
  - Galvanization
  - Painting in any RAL color possible
  - nitrided finish
- Customized execution according to your drawing
- Technical support as well as assistance in optimizing production and costs
- Engineering
- Modern measurement technology

## Customer-oriented service range

- Technical design
- Feasibility
- Lifetime calculation
- Customizing
- 3D models
- Inspection certificate
- Initial sample test report
- Material analyses
- Salt spray test
- Process optimization
- MRO/Service
- etc.
